Frontend: *HTML,CSS, Javascript*

Non-Techincal
- Communication skills
- Leadership skills
- Team-work skills
- Decision-making skills
- Situation-awareness skills

Projects

SkySync
Created a Responsive ,Live Weather Forecast Website using OpenWeatherMap API and Vanilla Javascript along with HTML and CSS.
The Website provided the local time and date of the location searched and indicated the weather with change in background color and icons representing different weathers and dynamically changed the weather , humidity level and wind speed, along with providing the facility to find that Location on Google maps from the navbar of the website and find the future weather forecast with a direct connection to the openweathermap weather forecast of the searched city.
